

ROYALFIL GS 12M (E71T-1M)

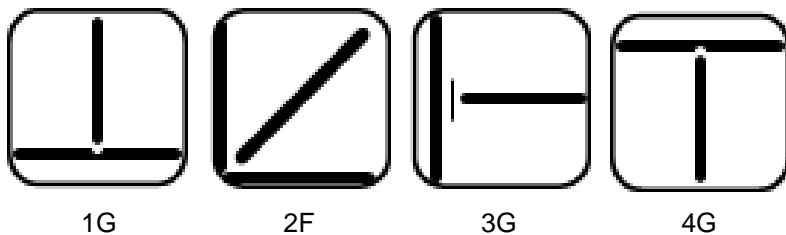

AWS A / SFA 5.20 E71T-1M

Applications

Royalfil GS-12M is designed for single and multiple pass welding of low and medium carbon steels. Suitable for joining steels conforming to ASTM A-36 /A-36M, A 283 / A 283M, A 414 / A414M, Fabrication in chemical plant machinery structures & Steel Sheets in ship building, auto industries, heavy bridges, towers, electrical appliance industries, earth moving equipments etc.

Characteristics on Usage

Royalfil GS-12M is an all position rutile type flux cored wire designed for optimum performance when using 80% Argon – 20% CO₂ shielding gas. Weld Metal is consistently free of inclusions, porosity & is of radiographic quality. Slay coverage is complete & gets removed very easily. This wire characterized by a spray transfer, low spatter loss, less fumes & having ability produce higher deposition rates. It is more resistant to burn-through also.
