## ROYAL -ER 80SB6 (ER 80SB6.)

### Applications

It is used for welding material of similar composition .Usually in the form of pipe or tubing.

### **Characteristics on Usage**

It gives about 4.50 to 6.0% Chromium and 0.50 % Molybdemum type weld deposit. The alloy is an air hardening material and therefore when welding with this filler wire rod, preheat and post weld heat treatment are required

#### **Welding Positions**

**Shielding Gas** Argon + 2% Oxygen

# Packing

Each Packets content 5 kg of Wire Rods having length 500 mm,1000mm
Also Available in MIG Wire Size: 0.80mm, 1.00 mm, 1.20 mm in 5 kg and 12.5 kg spool.
Standard Wire Diameter
